

ELIMINATE

TOILET ODOUR.

SAVE ENERGY.

The most effective toilet
odour extraction system.

hygizone™
Superior Odour Extraction

: Hello.

Before you read on, consider the lasting impression a clean bathroom experience has on a person.

Often the most neglected area in retail, hospitality or commercial environments the toilet zone gets the greatest criticism, and we understand why!

We want to create a world that is **hygienic, pure & clean.**

So we invented the Hygizone, the ultimate odour extraction system for commercial and residential toilets.

• Ok go ahead, turn the page!

Introducing the Hygizone.

The super savvy, **source-based** toilet odour extraction system.

When you specify the Hygizone, you eliminate the age old problem of toilet odours and airborne bacteria. Unlike traditional extraction systems that draw odour out of the toilet bowl and into the air we breathe, the Hygizone does the opposite and draws odour particles inwards, preventing it from leaving the toilet bowl all together.

So what's the difference?

The Hygizone difference comes in the form of our patented source-based odour extraction technology, resulting in performance that isn't simply better, it is superior too. By extracting toilet odour directly from the source, the Hygizone effectively reduces the contamination of clean air and creates an odourless toilet environment.

Energy Saving Solutions.

According to an environmental assessment by WSP (UK), Hygizone has proven to save energy when compared to traditional extraction systems that consume large amounts of costly airconditioned air in an attempt to dilute harmful toilet odour. Less air wasted equals reduced capital & running costs.

It's More Hygienic

The Hygizone system has proven to be the most effective extraction solution in preventing harmful germs and bacteria from contaminating the air you breathe.

It's Fresher

The Hygizone eliminates the need for costly air fresheners that are often overpowering and only serve to mask odour problems, instead of eliminating them at the source.

It's Smarter

Superior, patented extraction technology expels odour directly from the toilet bowl to the outside air. Our concealed cistern solution for single toilet environments comes with an intelligent infrared auto-on sensor to ensure your system runs efficiently.

It's Discreet

Embrace the freedom of open-plan environmental design with confidence and install a Hygizone to keep the bathroom space looking as good as it is odourless.

Zero Maintenance

The Hygizone system requires no maintenance.

100% User-Satisfaction

Toilets fitted with the the Hygizone keep tenants and customers happy.

Guaranteed Performance, Proven Results.

System details are available on www.autospec.co.za

We offer 4 solutions, suited to most commercial and residential needs.

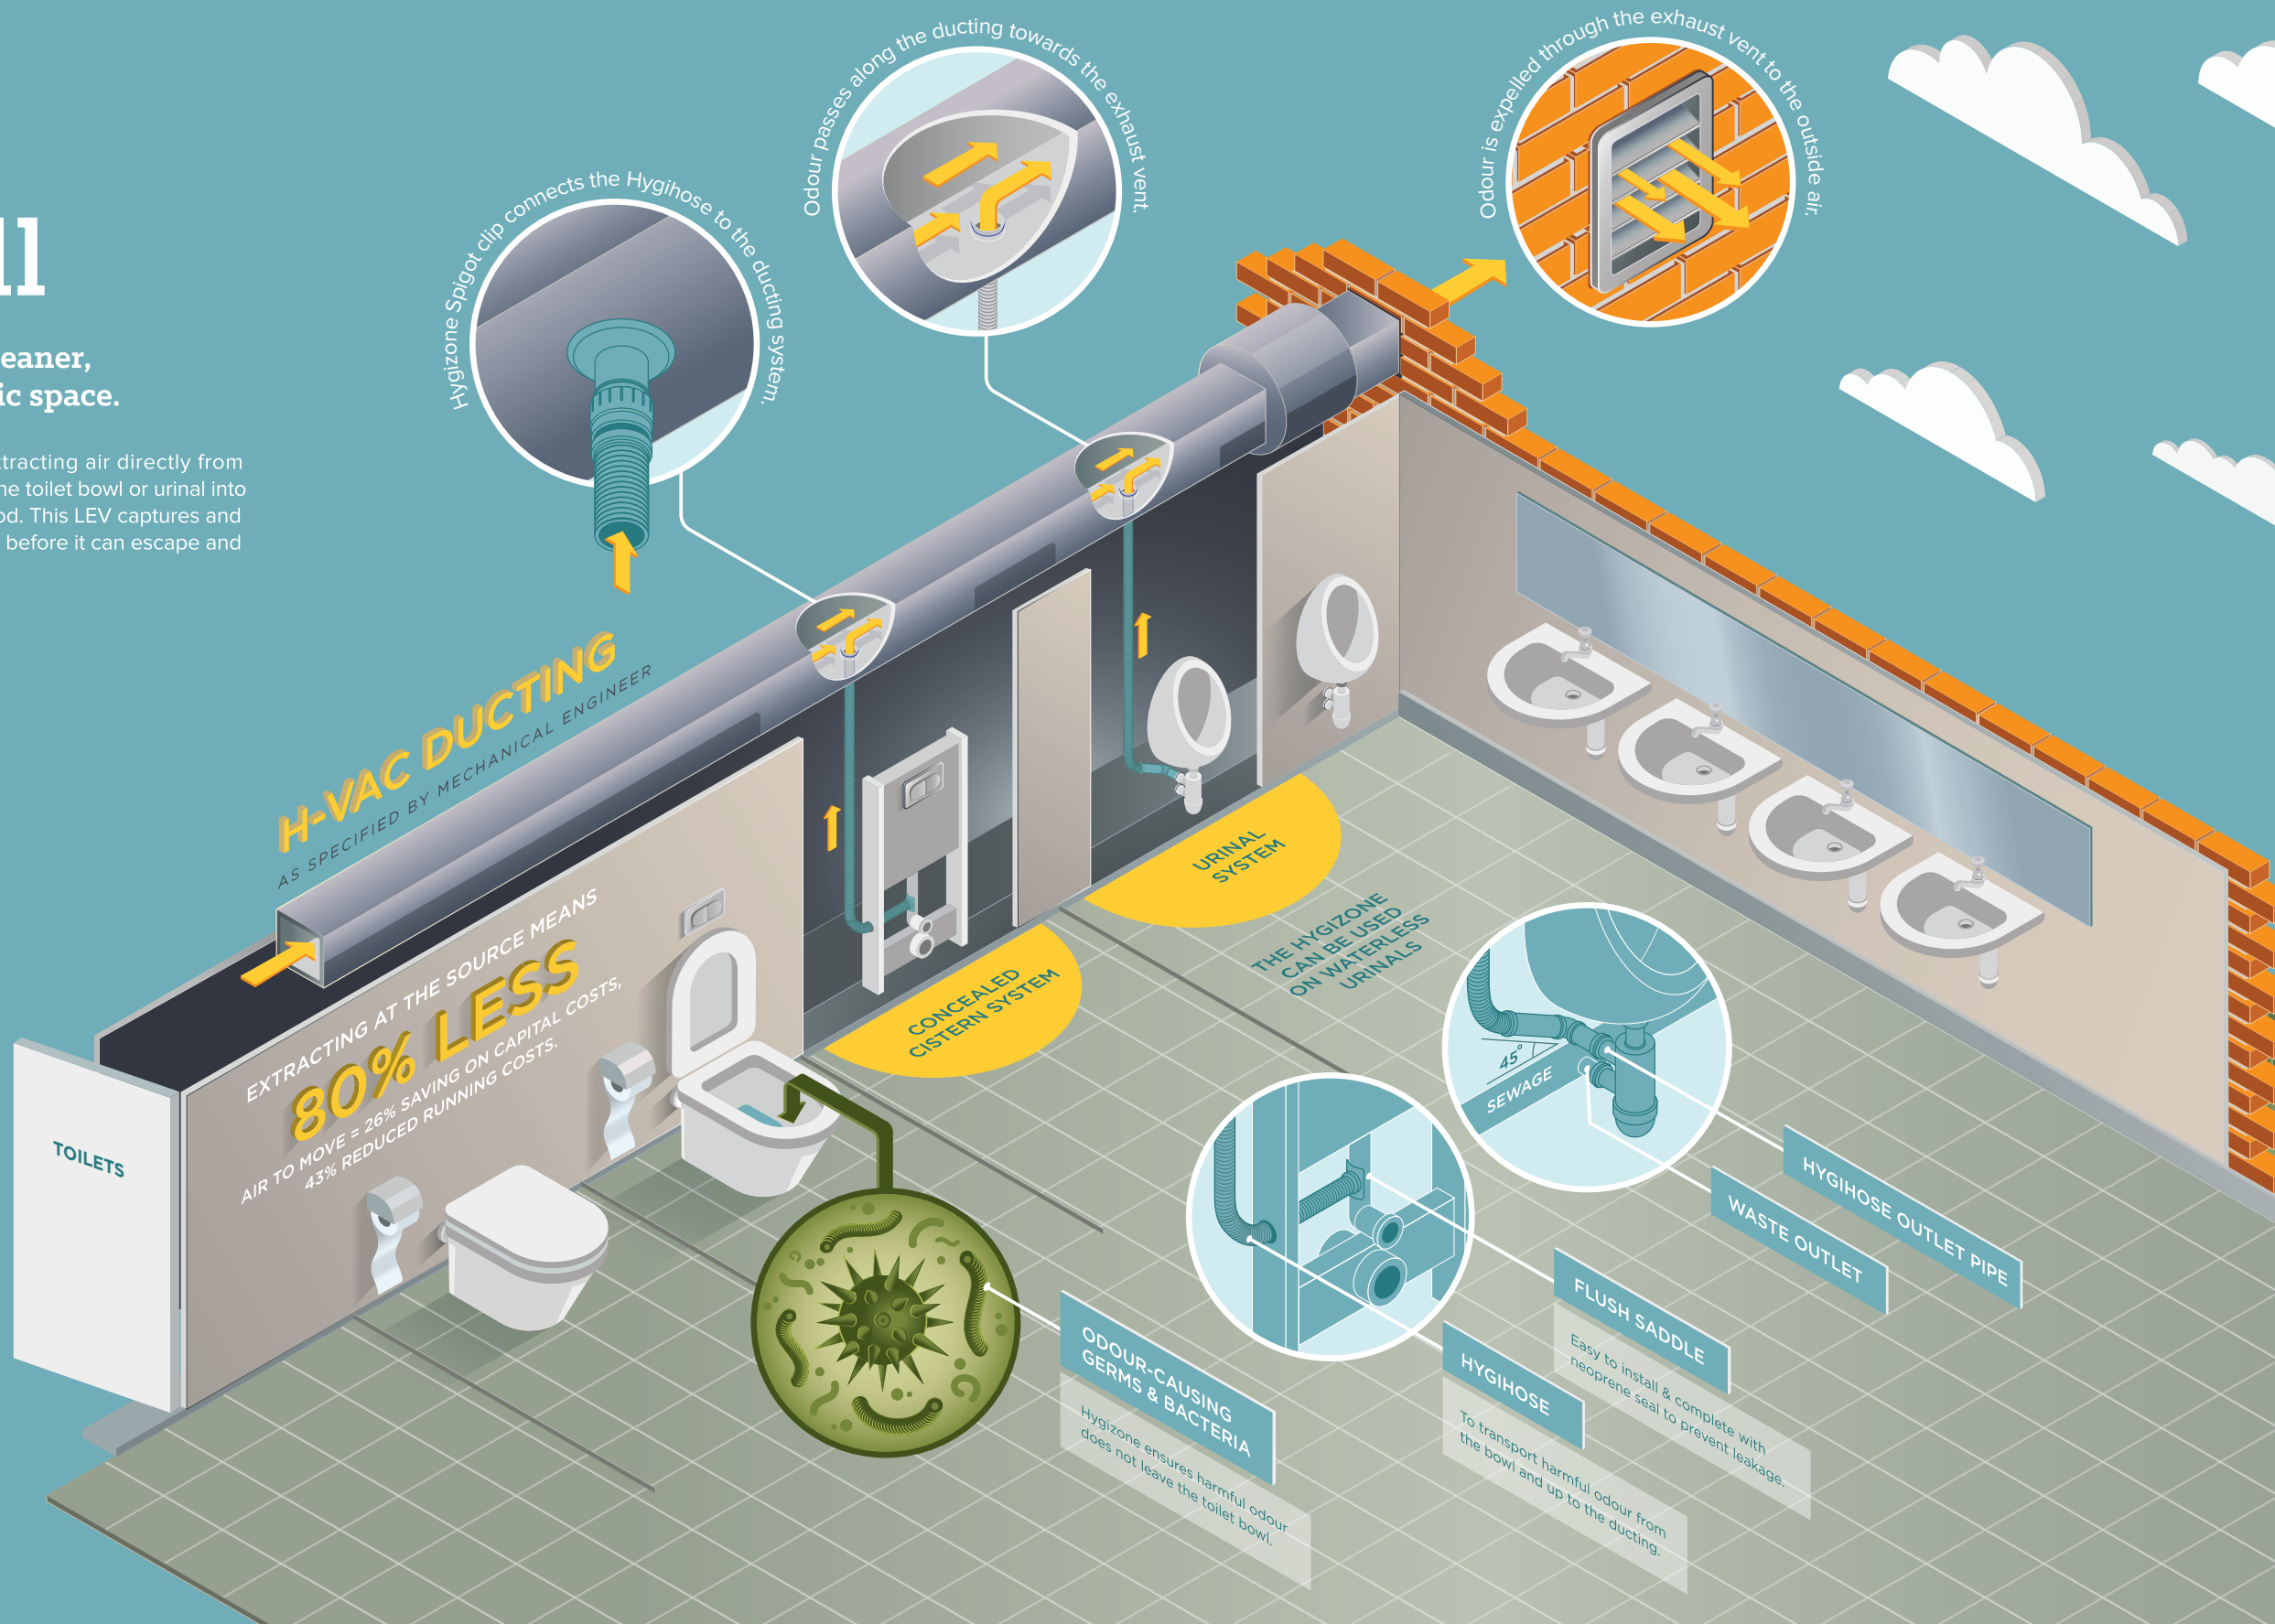

- 1 Concealed Cistern system
- 2 Flushmaster system
- 3 Our Patented Waterless Urinal system
- 4 Standard Urinal systems

Our journey was inspired by the profound desire to solve an everyday problem, we believe we have created an extraordinary solution.

In a nutshell

The result? **A fresher, cleaner, greener & more hygienic space.**

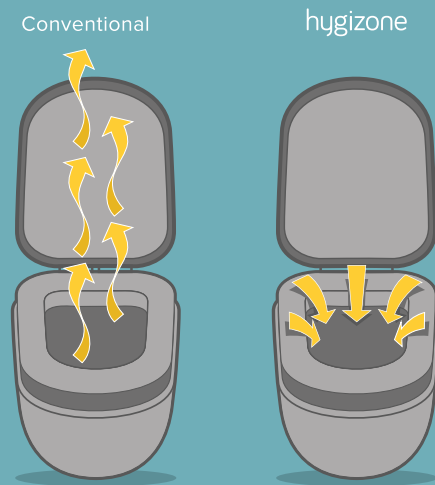

The Hygizone system works by extracting air directly from toilet bowls and urinals, converting the toilet bowl or urinal into a Local Exhaust Ventilation (LEV) hood. This LEV captures and removes the odour-causing bacteria before it can escape and contaminate the toilet environment.

TEST LOCATION: BALLITO LIFESTYLE CENTRE
NUMBER OF TOILET CUBICLES: 11

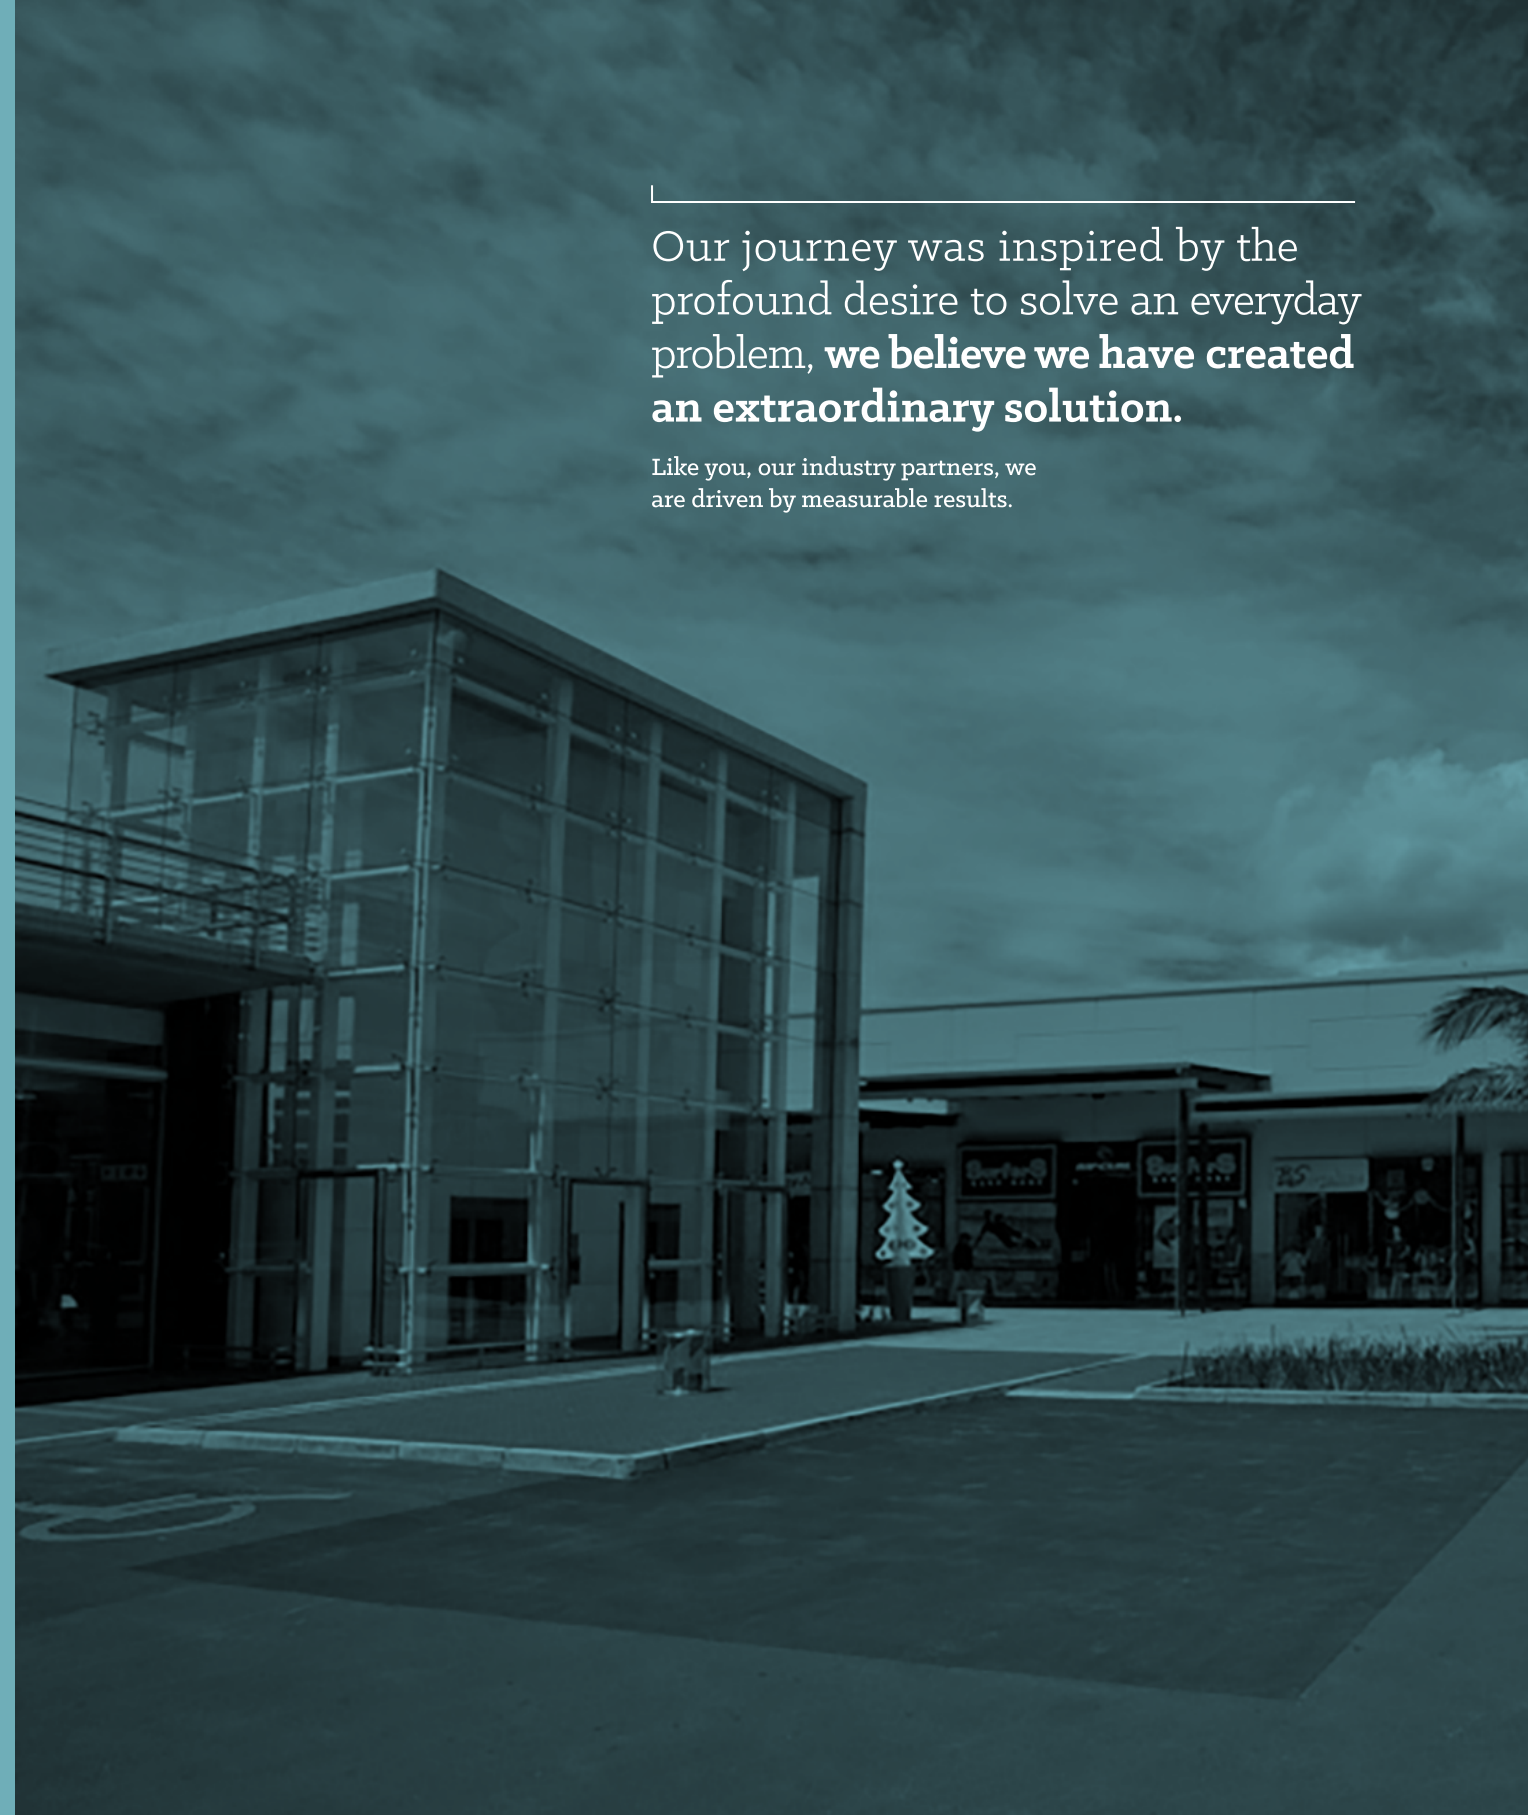

In an independent environmental study by Apex, the toilets connected to the Hygizone odour extraction system proved to be **23 times more hygienic** than if odour was extracted with a traditional system. Better still, the washbasin area proved to be 10 x less contaminated with harmful odours and bacteria that, without the Hygizone, would typically spread from the toilet bowl to the rest of the environment.

10 x less
contamination

Our journey was inspired by the profound desire to solve an everyday problem, **we believe we have created an extraordinary solution.**

Like you, our industry partners, we are driven by measurable results.

Our Product Solutions cater for:

- **Commercial** concealed-cistern toilets, flush-master toilets and urinals.
- **Residential** concealed-cistern toilets.

Easy Installation

Good To Know!

To promote infection control in hospitals and related health facilities, the KZN Department of Health has specified the Hygizone to prevent the spread of harmful airborne bacteria.
